Tolerances may occur. For detailed weight information refer to axle weight calculation sheets. • Toleranzen können auftreten. Detaillierte Gewichtsangaben erhalten Sie auf den Achslast-Berechnungsunterlagen. • Des tolérances sont acceptables. Pour des informations de poids détaillées, se rapporter aux planches de calcul de poids de l'essieu. • Se aceptan tolerancias. Para obtener información detallada sobre el peso, consulte las hojas de cálculo de peso de los ejes. • Ci possono essere tolleranze. Per informazioni dettagliate sul peso consultare i fogli di calcolo del peso dell'asse. • Возможны отклонения. Подробную информацию по массе см. в расчетных таблицах нагрузок на ось.

Superstructure

Boom

12,8 m to 60,0 m six section TWIN-LOCK™ boom.
Maximum tip height 63,0 m.

Boom elevation

1 cylinder with safety valve, boom angle from -1,5° to +83°.

Load moment an independent anti-two block system

Load moment and independent anti-two block system with audio visual warning and control lever lock-out. These systems provide graphic display of boom angle, length, radius, tip height, relative load moment, maximum permissible load, load indication and warning of impending two-block condition with lock-out hoist function.

Cab

Aluminium, full vision, tiltable (approx. 20°), safety glass, adjustable operator's seat with suspension, engine-independent heater. Armrest-integrated crane controls. Ergonomically arranged instrumentation and crane operating controls.

Slewing

2 slewing gears with axial piston motors, planetary gears, automatic break.

Counterweight

44,5 tonnes, consisting of various sections (30,9 t within 2,75 m vehicle width). Hydraulic removal system.

Hydraulic system

2 separate circuits, 1 axial piston variable displacement pump with electronic power limiting control and 1 axial piston variable displacement pump for slewing. Thermostatically controlled oil cooler. Tank capacity: 750 l.

Control system

Full electronic control of all crane movements using electrical control levers with automatic reset to zero. Integrated with the RCL and engine management system by CAN-BUS. Crane Control System (CCS) with system with graphic display. Crane Star telematics system.

Hoist

Axial piston motor with planetary gear and brake. Drum rotation indicator. IR - Hoist camera.

* Optional equipment

- Bi-fold swingaway 11,2/17,8 m - with hydraulic offset and luffing under load (0° - 50°), controlled from the crane cab.
- 8m boom and 8m jib extensions (maximum total length 33,8 m).
- Auxiliary hoist (in lieu of compensation counterweight).
- Auxiliary boom nose using two parts of line.
- Air-conditioning system.

Carrier

Chassis

Special 5-axle chassis, all-welded torsion-resistant box type construction in high strength steel.

Outriggers

4 double hydraulically telescoping beams with vertical cylinders and outrigger pads. Independent horizontal and vertical movement control on each side of the carrier and from the operators cab. Electronic level indicator with automatic levelling system. Spotlight for each outrigger beam integrated in carrier decking.

Engine

Mercedes Benz OM471LA, diesel, 6 cylinders, water cooled, turbocharged, 390 kW at 1700 rpm (80/1269 EWG fan loose). Max. torque: 2460 Nm at 1300 rpm. Fuel tank: 325 l + 325 l.
Engine emission: Euromot 4 / EPA / CARB Tier 4 final (non road).

Transmission

Mercedes G 280-16 gears forward and 2 reverse. 2-stage transfer case with longitudinal differential lock.

Drive/Steer

10 x 6 x 10.

Axle lines

5 axle lines, axle lines 1, 2, 3, 4 and 5 steered, axle line 2, 4 and 5 driven.

Suspension

MEGATRAK®. All wheels with independent hydropneumatic suspension and hydraulic lockout. Longitudinal and transverse level control with automatic on highway levelling system. Range +195 mm/-105 mm. Active suspension control on outrigger control units.

Tyres

10 tyres, 385/95 R25 (14.00 R25).

Steering

Dual circuit, hydraulic power assisted steering with emergency steering pump. Axle lines 1, 2, 3, 4 and 5 steer on highway. Separate electronic hydraulic (steer by wire) steering of the 3rd, 4th and 5th axle line for all wheel steering and crabbing.

Brakes

Service brake: pneumatic dual circuit disc brakes acting on all wheels, air dryer. Permanent brake: exhaust brake and constant throttle brake. Parking brake: pneumatically operated spring-loaded brake acting on axle lines 2, 3, 4 and 5.

Driver's Cab

2-mandesign, safety glass, driver seat with pneumatic suspension, engine-independent diesel air heater incl. 24 h timer. Complete instrumentation and driving controls. Air condition. 12 V plug. Fire extinguisher.

Electrical system

Three-phase alternator 28 V/150A, 2 batteries 12 V/180 Ah. Lighting system and signals 24 V.

* Optional equipment

- 10 x 8 x 10
- 10 tyres, size 445/95 R25 (16.00 R25) - Vehicle width 2,75 m.
- 10 tyres, size 525/80 R25 (20.5 R25) - Vehicle width 2,88 m.
- Folding bunk bed in carrier cab.
- Secondary water retarder.
- Reverse camera system.

* Other optional equipment on request.

Load charts • Traglasten • Capacités de levage Capacidades • Tabelle di portata • Таблицы грузоподъемности

The lifting capacities correspond to EN 13000:2010.

The lifting capacities likewise fulfil the requirements of ISO 4305 with regard to stability.

The lifting capacities are given in tonnes.

Lifting capacity = Payload + weight of hook block and suspending device.

The lifting capacities for the main boom only apply with the jib dismantled.

Lifting capacities > 98 t require additional equipment.

Lifting capacities > 130 t require special equipment.

The right is reserved to modify the load-carrying capacities.

Note: The details in this brochure serve only as general information. The determinant values for the operation of the crane are the lifting capacity tables belonging to it and the operating instructions.

Lifting capacities are indicated by boom length for different levels of extension. The actual boom length will be in accordance with the selected configuration for boom extension.

Die Tragfähigkeiten entsprechen EN 13000:2010.

Die Tragfähigkeiten erfüllen ebenfalls die Anforderungen von ISO 4305 bezüglich Standsicherheit.

Die Tragfähigkeitswerte sind in Tonnen angegeben.

Tragfähigkeit = Nutzlast + Gewicht der Hakenflasche und Anschlagmittel.

Die Tragfähigkeitswerte für den Hauptausleger gelten nur bei demontierten Spitzenauslegern.

Die Tragfähigkeitswerte > 98 t erfordern eine Zusatzausrüstung.

Die Tragfähigkeitswerte > 130 t erfordern eine Sonderausstattung.

Änderung der Tragfähigkeiten vorbehalten.

Anmerkung: Die Daten dieser Broschüre dienen nur zur allgemeinen Information. Maßgebend für den Betrieb des Kranes sind die zugehörigen Tragfähigkeitsstabellen und die Bedienungsanleitung.

Die Traglastwerte sind aus unterschiedlichen Teleskopierungen pro Auslegerlänge zusammengefasst. Die tatsächliche Auslegerlänge kann variieren.

Les capacités de levage correspondent à la norme EN 13000:2010.

En outre, les capacités de levage remplissent les conditions de la norme ISO 4305 en ce qui concerne la stabilité.

Les capacités de levage sont exprimées en tonnes.

Capacité = charge utile + poids du crochet et du dispositif d'élingage.

Les capacités de levage de la flèche principale ne sont valables que lorsque la fléchette est démontée.

Les valeurs de la capacité de levage > 98 t nécessitent un équipement spécial.

Les valeurs de la capacité de levage > 130 t nécessitent un équipement spécial.

Le fabricant se réserve le droit de modifier les indications de capacité de charge.

Remarque: Cette brochure fournit uniquement des informations d'ordre général. Les valeurs déterminantes pour l'exploitation de la grue figurent dans les tableaux des capacités de levage de la grue concernée et dans ses consignes d'exploitation.

Les capacités de levage sont indiquées par longueur de flèche pour différents niveaux de rallonges. La longueur effective de la flèche sera conforme à la configuration de rallonge de flèche choisie.

Las capacidades de elevación corresponden a la norma EN 13000:2010.

Las capacidades de elevación igualmente cumplen los requisitos de la norma ISO 4305 en relación con la estabilidad.

Las capacidades de elevación se ofrecen en toneladas.

Capacidad de elevación = Carga + peso del bloque de gancho y del dispositivo de suspensión.

Las capacidades de elevación de la pluma principal solo tienen validez con el brazo desmontado.

Los valores de capacidad de carga > 98 t requieren un equipamiento auxiliar.

Los valores de capacidad de carga > 130 t requieren un equipamiento especial.

Reservado el derecho a modificar las capacidades de transporte de carga.

Nota: Los datos que se incluyen en este folleto sirven únicamente como información general. Los valores determinantes para el funcionamiento de la grúa son las tablas de capacidad de elevación inherentes al mismo y las instrucciones de funcionamiento.

Las capacidades de elevación se indican en función de la longitud de pluma para distintos niveles de extensión. La longitud real de la pluma será acorde con la configuración seleccionada de extensión de pluma.

Le tavole di portata sono conformi alle norme EN 13000:2010.

I valori delle tavole di portata sono conformi anche ai requisiti delle norme ISO 4305 per quanto riguarda la stabilità.

I valori di portata sono indicati in tonnellate.

Capacità di portata = carico utile + peso del gancio e accessori di sollevamento.

I valori delle tavole di portata per il braccio principale si applicano solo con il jib smontato.

I valori di portata > 98 t richiedono un'attrezzatura supplementare.

I valori di portata > 130 t richiedono un equipaggiamento speciale.

Si riserva il diritto di modificare i valori di portata.

Nota: i dettagli forniti nel presente opuscolo servono solo come informazioni di carattere generale. I valori determinanti per il funzionamento della gru sono le tavole di portata appartenenti alla gru stessa e le istruzioni di funzionamento.

Le capacità di sollevamento sono relative alla lunghezza del braccio con differenti configurazioni di telescopaggio. Le lunghezze reali del braccio possono variare in base alla configurazione scelta per il telescopaggio del braccio.

Грузоподъемность соответствует EN 13000:2010.

Грузоподъемность соответствует ISO 4305 в отношении устойчивости.

Грузоподъемность указана в тоннах.

Грузоподъемность = полезный груз + вес крюкового блока и грузозахватных приспособлений.

Характеристика грузоподъемности основной стрелы действительна только при сложенном удлинителе.

Для значений грузоподъемности > 98 т требуется дополнительная оснастка.

Для значений грузоподъемности > 130 т требуется специальная оснастка.

Мы оставляем за собой право изменять грузоподъемность.

Примечание: В данной брошюре приведена только общая информация. Рабочие значения для крана приведены в таблицах грузоподъемности и инструкциях по эксплуатации.

Грузоподъемность указана в зависимости от длины стрелы с разными удлинителями. Действительная длина стрелы зависит от выбранной конфигурации удлинителя.
